

1. Pineapples and custard for pudding at camp and famine in Africa.

Pineapples grown by big multi-national fruit company.

Fruit company buys up most fertile land for plantation.

Local farmers forced off fertile land.

Farmers occupy marginal land unsuited to agriculture.

Tree-cover and vegetation destroyed by over-grazing.

Rapid desertification of marginal land.

Desertification leads to even lower rainfall

Drought / fammie cycle established

2. Burning properties of wood and London flooding?

Scouts use wood for cooking without knowing the burning properties.

Scouts use more wood than is required

Burning wood increases CO₂ in the atmosphere.

CO₂ in the atmosphere creates the 'greenhouse effect '

The average air temperature rises.

The polar ice caps begin to melt.

The level of the world's oceans rises.

The Thames Barrier is not high enough.

London (and many other places) flood.
